Senior Software Engineer | Agentic AI & SDLC Automation
9 years of Software Engineering experience. Experienced in automated financial reporting and payment systems. Utilized modern-software tools of agentic coding, distributed systems, and object-oriented programming to deliver enterprise-level code.

SKILLS

- **Languages & Architecture:** .NET/C#, Kendo MVC, Javascript, Typscript, SQL, Postgres, Microservices, Distributed systems
- **Cloud & Tools:** AWS, Docker, Git, Jenkins, Gitlab, IIS
- **AI & Automation:** Claude, Gemini, Selenium, Regex, ArgoCD

PROFESSIONAL EXPERIENCE

Conservice | *2016 - Present*
Senior Software Engineer | *2024 - Present*
- Utilize agentic coding to automate workflows and produce high-quality code
- Design and manage complex distributed systems
- Lead initiative to improve data-cleanliness. Saved > 2000 employee hours
- Mentor junior engineers

Intermediate Software Engineer | *2021 - 2024*
- Collaborated to write a distributed-payment system with billions of dollar throughput
- Implemented distributed system to make legacy system scalable

Software Engineer | *2019 - 2021*
- Optimized complex SQL queries resulting in > 70% efficiency gain
- Modernized legacy system into efficient and testable code

Assistant Software Engineer | *2017 - 2019*
- Utilized Regex to program OCR templates
- Designed and built web-crawlers using Selenium for automation

Data Entry | *2016 - 2017*
- Efficiently and accurately imported complex data into proprietary system

EDUCATION

Utah State University
B.S. Management Information Systems | *2015 - 2019*
